 EGR valve cleaning WITHOUT DISMANTLING - Cleaner kit test Before/After - EGR valve cleaning WITHOUT DISMANTLING - Cleaner kit test Before/After by TutoBuild Eng 8,984,227 views 9 years ago 7 minutes, 34 seconds - How to clean an EGR valve without dismantling with a Bardahl EGR valve cleaner kit. EDIT 12/02/2015: The video uses the pack ...  
 Test of a EGR valve cleaner kit without dismantling (Diesel engine)  
 The product which will be tested is a professional product for professional use  
 According to the manual, the engine mileage must be less than 95 000 miles  
 The vehicle which will be tested has exceeded this limit (113 602 miles)  
 Here the valve before cleaning  
 The valve refitting  
 The kit contains an EGR valve aerosol cleaner and an EGR valve diesel additive to add into the fuel tank  
 The aerosol must be pulverized between the air filter and the intake manifold, after the air-flow sensor  
 This vehicle does not have an air-flow sensor (Renault Megane 1), the spraying is performed directly after the air filter  
 This vehicle has an air-flow sensor (Peugeot 206 hdi), the spraying is performed after the air-flow sensor  
 Disconnect the air intake pipe  
 Spray 3 or 4 short bursts of 1 second maximum into the air intake pipe  
 Wait-1-minute between each spray while changing engine speed from 1000 to 3000 rev / min  
 Renew the operations until exhaustion of the aerosol by doing a pause all the 10 times  
 Pause the tenth time  
 Then resume operations  
 Engine speed between 1500 and -2000 rpm  
 Stop when the aerosol is empty  
 Refit the air intake pipe  
 Pour the diesel additive in 20 liters of fuel  
 Drive for 10 miles while regularly increasing engine speed to 3000 rpm  
 Removing the EGR valve to judge the effectiveness of the product (this is not done in the normal operating mode!)  
 Despite the too high mileage of the engine (110 000 miles); it is noted that the product managed to eliminate the main impurities  
 If a fault indicator is displayed on the dashboard, ask a mechanic to erase the fault code with a diagnostic tool
