Yamaha Engine Troubleshooting

The oil looks like milk chocolate (not a good sign)

Exhaust valves in cylinders 2 to 4 look okay

Intake valves are surprisingly clean

Cylinder I intake valve guides are broken and valve stems bent

Creamy oil indicates water contamination

We removed the 4 spark plugs

Good news, cam chain is intact

Something's restricting the engine

and the cam chain tensioner assembly

We removed the chain dampers

and started dismantling the cylinder head assembly

The camshafts looked okay

We removed the air cooler bracket

The mounting bolts need to be removed in sequence to avoid damage to cylinder head

The head gasket looked okay

The valves are corroded from water contamination
