How to Make a Simple Clutch or Brake Bleeding Kit - How to Make a Simple Clutch or Brake Bleeding Kit by ScrewsNutsAndBolts 680,459 views 4 years ago 5 minutes, 45 seconds - How to make and use a simple clutch and **brake**, bleeding kit. Here I am using it to bleed the clutch system on a 2000 Toyota Yaris ...

Drill an 8mm hole through the bottle lid

Clear away all the small pieces of plastic from the lid

Push the PVC tubing though the bottle lid

Make sure it goes to the very bottom of the bottle

Fill about 1/4 of the bottle with new brake/clutch fluid

Replace the lid and tubing

Ensure that the end of the tubing is fully submerged in the fluid

Remove the bleed nipple cap

Use an 8mm spanner to open the bleed screw

If you're using a ring spanner you can position it over the threads and leave it there

Push the end of the PVC tubing securely onto the bleed nipple

Open the bleed screw about 104 turn anticlockwise

Place the bottle somewhere where it will remain upright throughout the process

Remove the brake master cylinder fluid reservoir cap

Top the fluid up to the MAX line before you start the bleeding process

Tighten the bleed screw clockwise

Remove the tubing from the bleed nipple.

Remove the ring spanner (if used)

Replace the bleed nipple cap

H.C.B-A1169 VOLVO TRUCK FRONT/REAR BRAKE SHOE LINING INSIDE CALIPER - H.C.B-A1169 VOLVO TRUCK FRONT/REAR BRAKE SHOE LINING INSIDE CALIPER by
